OVAL LIGHTING UPGRADES

Oval lighting that meets the AFL Preferred Community Facility Guidelines is a priority for SANFL as documented in the SANFL Infrastructure Plan 2022-2032.

The renewal / upgrade of oval lighting is a technical project that requires the involvement from specialised sports lighting consultants. The process may involve LUX testing of existing lighting level, engineering assessment of existing light towers for suitability of reuse and site specific design to deliver the required LUX levels for the upgraded lighting solution. Finally, LUX testing after commissioning the new equipment completes the process.

SANFL's preferred lighting supplier is [CME](#), partnering with SANFL to deliver sustainable oval lighting projects. Other recommended consultants are:

- [Sports Lighting SA \(Philips\)](#)
- [SylvaniaSchreder Sports Lighting](#)
- [Musco](#)
